

My Assistant

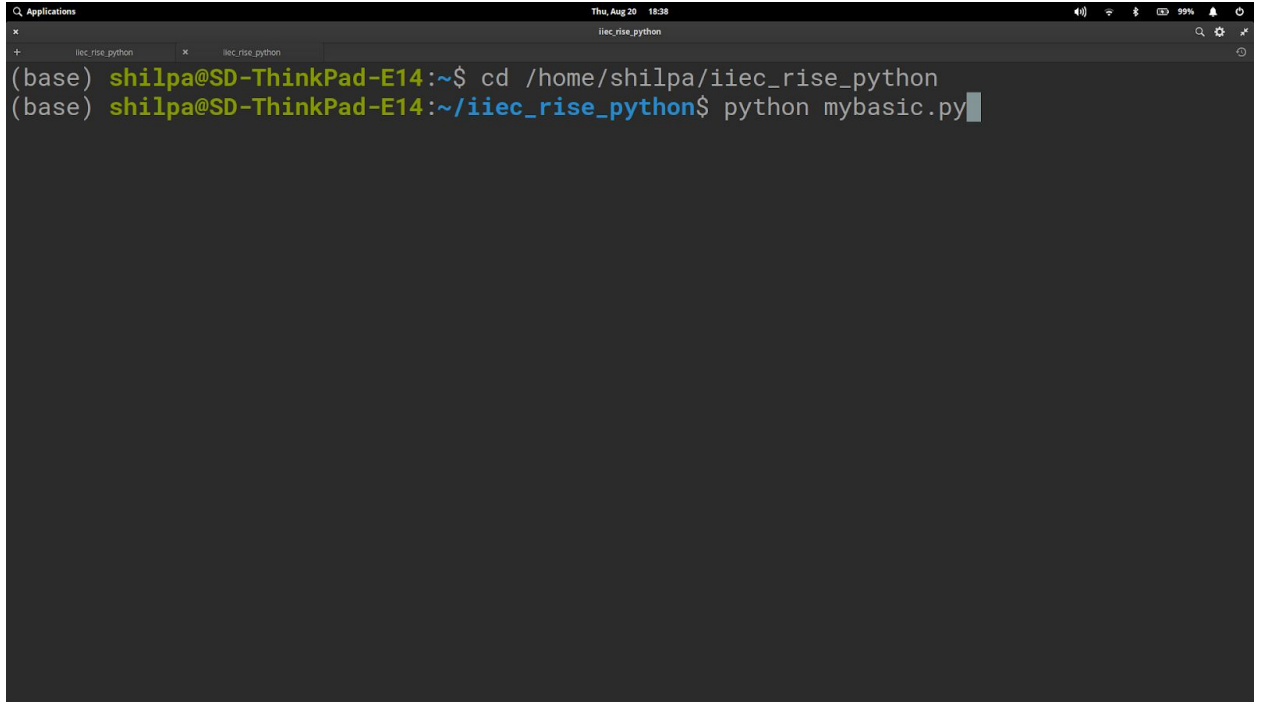

This documentation contains the bits and pieces of how to install the required modules and how to use the assistant.

- To start the text to speech module i.e, pyttsx3 we can use- pip install pyttsx3.
- Firstly we need to open the folder where our file is kept.

A screenshot of a terminal window titled 'Applications' with a timestamp of 'Thu, Aug 20 18:38'. The terminal shows two commands being executed in a virtual environment '(base)'. The first command is 'cd /home/shilpa/iiec_rise_python' and the second is 'cd /iiec_rise_python'. The prompt changes from '~\$' to '~/iiec_rise_python\$' after the second command.

```
(base) shilpa@SD-ThinkPad-E14:~$ cd /home/shilpa/iiec_rise_python
(base) shilpa@SD-ThinkPad-E14:~/iiec_rise_python$
```

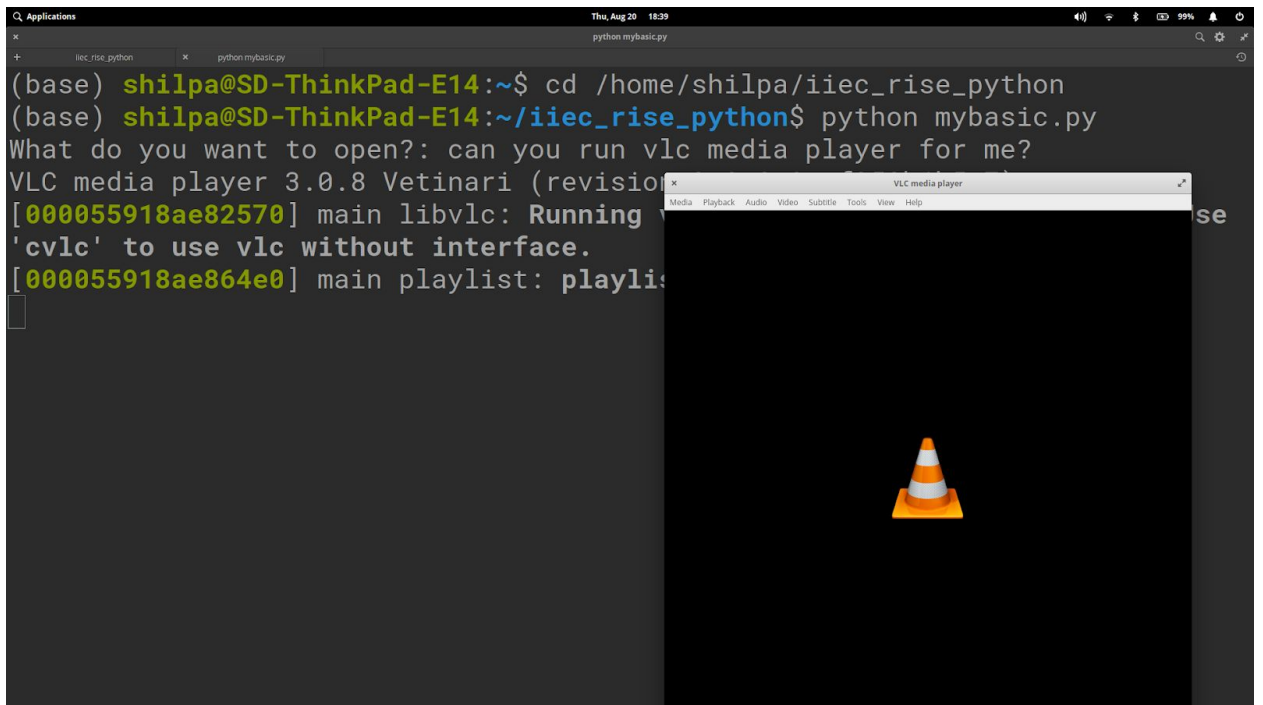

- Then go to the code file.
